CRYSTAL CLEAR

EDITION OF 7

Size: 125x125cm

THE TERM CRYSTAL

The term crystal is often used to refer to glassware that has a more elegant form than the everyday glassware.

It has a misleading name because it is not crystal at all.

It is merely glass that contains lead oxide.

The term 'crystal' is inaccurate, as glass lacks a crystalline structure, which is necessary for a crystal.

The use of the term crystal in glassware is retained from the Venetian word Cristallo.

In the 15th century they used this word to describe the quartz imitated by Italian glassmakers. For commercial reasons glassmakers started using the name crystal.

It has stuck around for centuries and remains popular.

BEAUTIFUL BUBBLES

EDITION OF 7

Size: 125x125cm

WHY DO WINE CONNOISSEURS PREFER TO DRINK
CHAMPAGNE FROM A CRYSTAL GLASS
THAN FROM A GLASS?

A crystal glass is unequalled for its clarity, a twinkling translucency that radiates the very spirit of fragrance. It's brilliantly transparent and makes the champagne color stand out better.

Giving more bubbles does not depend on the type of material, but on its smoothness.

Sometimes a scratch is made at the bottom of the glass, Bubbles then continue to rise from that location.

CLEAR CRYSTALS

EDITION OF 7

Size: 125x125cm

NATURAL HEALING POWERS

Harmony Energy Healing Psychic abilities Clarity Calmness

Rock crystal is one of the most powerful healing stones on earth. It is highly prized for its ability to clear the mind and helps with improving self-respect.

It connects to the higher self, removes negativity and allows access to your spirit guides. It's also a channeler of universal love.
